EHTASHAM ANWAR

Full Stack .NET Developer | GenAI & Agentic AI

+92 348 9851338 | ehtashamanwar98@gmail.com | linkedin.com/in/ehtashamanwar338 | github.com/ehtasham338

PROFESSIONAL SUMMARY

Results-driven Software Engineering graduate of **COMSATS University, Islamabad** and Full Stack .NET Developer with hands-on, production-grade experience building scalable web applications using ASP.NET Core (MVC & Web API), C#, Entity Framework Core, ADO.NET, and SQL Server. Skilled in Clean Architecture, RESTful API design, ASP.NET Core Identity, custom authentication, and secure coding practices (SQL Injection, XSS, and CSRF prevention). Experienced in performance optimization through Redis and In-Memory Caching, query tuning, and database design. Actively building GenAI and Agentic AI skills with LangChain and LangGraph, and currently learning RAG, Vectorless RAG, Deep Agents, Guardrails, LLM Evaluation, and LLM Gateways. Comfortable across the full SDLC using Git/GitHub and Docker, with a strong track record of delivering secure, maintainable, and high-performance systems. A fast learner with an ownership mindset who enjoys debugging, testing, and automating work to make teams faster.

TECHNICAL SKILLS

Languages & Frameworks: C#, ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, ADO.NET

Database: SQL Server, Stored Procedures, Triggers, Indexing, Transactions, Database Normalization, Performance Tuning

Architecture & Design: Clean Architecture, N-Tier Architecture, OOP, SOLID Principles, Design Patterns, RESTful API Design

QA, Debugging & API Testing: Debugging & Root-Cause Analysis, REST API Testing & Validation (methods, headers, payloads, status codes, JSON responses), SQL Data Validation, Legacy Code Analysis

GenAI & Agentic AI: LangChain, LangGraph, RAG, Vectorless RAG, Deep Agents, Guardrails, LLM Evaluation, LLM Gateway

Authentication & Security: ASP.NET Core Identity, Custom Authentication, JWT, Google OAuth, Forgot/Reset Password, SQL Injection Prevention, XSS & CSRF Protection

Performance & Caching: Redis Caching, In-Memory Caching, LINQ Query Optimization, Application Performance Tuning

Frontend: JavaScript, jQuery, Fetch API, HTML5, CSS3, Bootstrap, Razor Views

Tools & Practices: Git, GitHub, Docker, Serilog, Global Exception Handling, Legacy Code Refactoring, Clean & Maintainable Code

Documentation: Project Planning Documents, Software Design Documents (SDD)

Soft Skills: Communication, Team Collaboration, Problem Solving, Analytical Thinking, Continuous Learning

PROFESSIONAL EXPERIENCE

Backend Developer (.NET) **May 2026 – Present**

Owasofy Technology — Rawalpindi, Pakistan (Onsite)

- Collaborate with senior developers on real-time client projects, developing and maintaining RESTful APIs using ASP.NET Core Web API.
- Implement CRUD operations and integrate third-party services, including email services and Microsoft Graph API.
- Perform debugging and API testing to ensure the reliability, correctness, and stability of backend services.
- Analyze and understand legacy codebases, safely implementing new features without disrupting existing functionality.
- Optimize database queries and improve application performance using EF Core, ADO.NET, and Dapper.
- Implement authentication and authorization mechanisms to secure APIs and protect sensitive data.
- Work with Microservice Architecture and the CQRS pattern, including designing and building an API Gateway.

GenAI & Agentic AI Training (alongside role) **2026 – Present**

Owasofy Technology — Rawalpindi, Pakistan

- Completed hands-on learning of LangChain and LangGraph for building LLM-powered applications and agent workflows.
- Currently studying RAG pipelines, Vectorless RAG, Deep Agents, Guardrails for safe LLM outputs, LLM Evaluation, and LLM Gateways.

Full Stack .NET Developer — Intern **Oct 2025 – Jan 2026**

Truckoom Technology — Remote (UAE)

- Gained hands-on experience in full-stack .NET Core development, C#, OOP, design patterns, and Clean Architecture (N-Tier).
- Practiced EF Core, ADO.NET, and LINQ queries, along with SQL Server database design, through real-world practice tasks.
- Built responsive front-end interfaces using HTML, CSS, Bootstrap, jQuery, and Fetch API for dynamic, API-driven pages.
- Learned and worked on real-time projects, applying full-stack .NET Core concepts end-to-end.

PROJECTS

Bakery Management System (BMS) — ASP.NET Core MVC & Web API, SQL Server

GitHub: github.com/ehtasham338/BakeryManagementSystem-bms-

- Built a full-stack Bakery Management System with an Admin Panel featuring Authentication and Authorization.
- Implemented Customer Management, Order Management, Item/Category Management, and Inventory Management modules.
- Developed an Invoice Management module for automated invoice generation.
- Built using Clean Architecture (N-Tier) with Serilog logging and Global Exception Handling.

Additional practice projects (frontend and backend) are available on GitHub: github.com/ehtasham338

EDUCATION

BS Software Engineering **2021 – 2025**

COMSATS University, Islamabad

CERTIFICATIONS

- Full Stack .NET Developer — Truckoom Technology

LANGUAGES

- English — Professional Working Proficiency
- Urdu — Native Proficiency
